

CBRE HORIZONS — HOTEL FORECAST

Miami Beach Submarket — Upper Upscale Chain Scale

Publication Date: April 18, 2026

CBRE Hotels Research — Confidential to Subscriber

Forecast Summary

Five-year outlook for the Miami Beach Upper Upscale segment. Forecast assumes continued leisure-led demand normalization, group recovery completing by year 2, and ADR growth tracking core inflation after the year-1 reset. RevPAR CAGR over the forecast horizon is 3.4%, with occupancy stable in the 76-78% band.

Annual Forecast — Miami Beach Upper Upscale

Period	Occupancy	ADR	RevPAR	RevPAR Growth
Year 1 (2026)	76.0%	\$295.00	\$224.20	—
Year 2 (2027)	77.0%	\$304.00	\$234.08	4.4%
Year 3 (2028)	77.8%	\$313.00	\$243.51	4.0%
Year 4 (2029)	77.8%	\$322.00	\$250.52	2.9%
Year 5 (2030)	77.6%	\$331.50	\$257.24	2.7%

Key Drivers

- **ADR:** 3.0% CAGR; pricing power preserved by limited new supply (South Beach historic district).
- **Occupancy:** stable 76-78%; demand growth absorbed by 1-2% supply growth.
- **RevPAR growth:** 3-4% per year, modestly above market consensus.
- **Risk:** insurance / operating cost inflation may compress flow-through even as RevPAR grows.
