

HOTEL P&L; BENCHMARK

Miami Beach Lifestyle Peer Set — TTM March 2026

Source: Industry P&L; Benchmark Database (HotStats-equivalent)

Peer Set Size: 18 hotels (lifestyle + upper-upscale, Miami Beach)

Margin & Expense Ratios

Aggregate ratios are equal-weighted across the 18-property peer set. All percentages are stated against the parent revenue line (rooms-dept against rooms revenue; A&G; / S&M; / utilities / fixed charges against total revenue).

Line Item	Peer Set Median
Rooms Departmental Expense (% rooms revenue)	25.0%
F&B Departmental Margin	30.0%
GOP Margin (% total revenue)	38.0%
A&G (% total revenue)	7.5%
Sales & Marketing (% total revenue)	6.0%
Utilities (% total revenue)	3.8%
Property Taxes (% total revenue)	4.2%
Insurance (% total revenue)	2.6%

Per-Room Productivity (PAR & POR)

PAR = per available room (annualized; total ÷ keys). **POR** = per occupied room (revenue ÷ occupied roomnights).

Metric	Peer Set Median
Rooms Revenue PAR (per available room, annual)	\$78,400
Total Revenue PAR (per available room, annual)	\$112,800
NOI PAR (per available room, annual)	\$28,150
Rooms Revenue POR (per occupied room)	\$285.20
F&B Revenue POR (per occupied room)	\$94.50

Reading the Benchmark

- A subject hotel running rooms-dept expense above 27% is a flag for labor-cost or productivity drift.
- F&B; margin in this peer set is unusually strong — driven by amenity fees and grab-and-go formats; full-service F&B; alone runs closer to 18-22%.
- GOP margin of 38% is at the high end of the lifestyle range; full-service comparables typically sit at 32-36%.
- PAR / POR figures normalize across keys + occupancy; use them to compare the subject to peer set without

size distortion.
